

## **Bullers Wood School for Boys Community Newsletter 08.05.19 Progress Update**

---

Dear Residents,

We are pleased to announce that construction works for Bullers Wood School for Boys' new home at St Hugh's Playing Fields are getting underway this week. The immediate focus will be the construction of temporary buildings to accommodate the school from September. The overall scheme will consist of three phases.

- Phase 1: Install of the temporary school and moving the students in (May-September 2019)
- Phase 2: Construction of the main permanent school (May 2019-December 2020)
- Phase 3: Remove the installation of the temporary school upon the completion of the final decant (January-April 2021).

Works have started with the widening of the gated entrance from Bickley Road, this will allow construction traffic to gain access to site. Landscaping works are also due to start on site next week to enable the main construction to commence.

In the coming month we will be demolishing the ATC hut, starting the excavation for the temporary school foundations and car park construction and preparing for the installation of the modular units that will form the temporary school. We will also commence with the construction site set-up, including establishing our secure boundary.

We will adhere to the Considerate Constructors Scheme: Kier are committed to ensuring that the project is run in a safely and orderly manner, keeping any disruption to a minimum.

**Further information and updates will be available throughout the construction process on our project website:**
